SAPID-590032928

BATCH-15

Aim

To write a C program to find the GCD (Greatest Common Divisor) of two positive integers using a recursive function based on Euclid's algorithm.

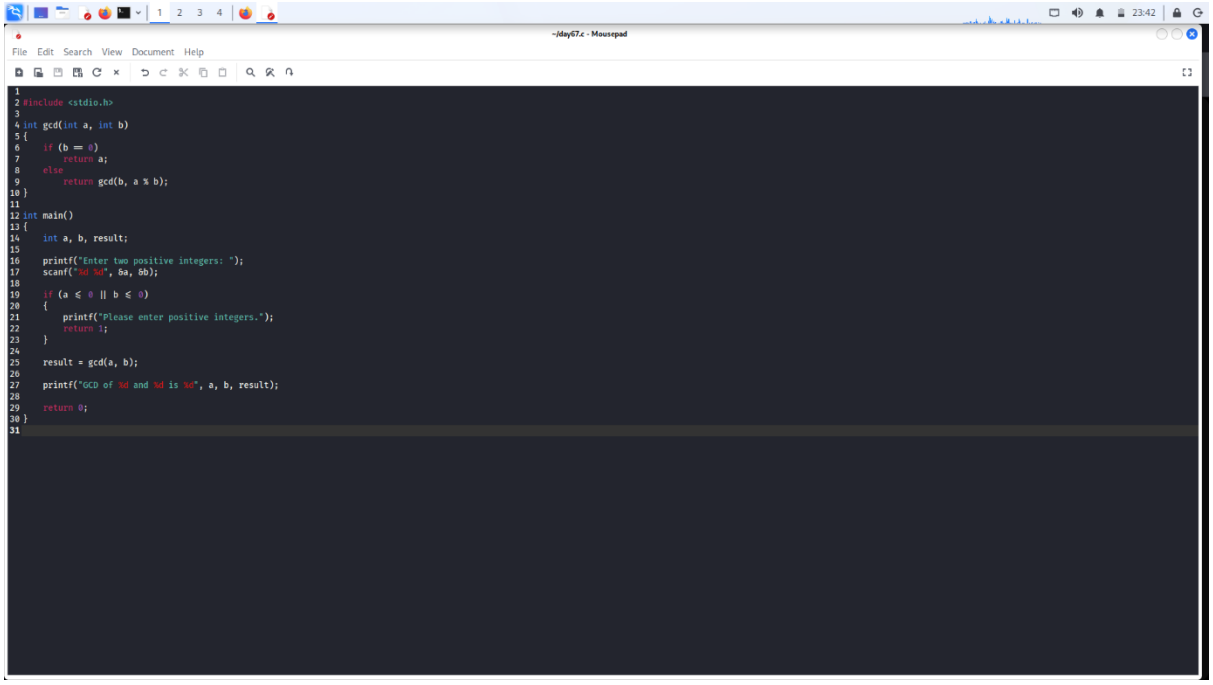

Problem Statement

Write a recursive function to find the GCD of two positive integers using Euclid's algorithm.

Algorithm

1. Start.
2. Declare two integer variables a and b.
3. Read two positive integers from the user.
4. Define a recursive function gcd(a, b).
5. If b == 0, return a.
6. Otherwise, return gcd(b, a % b).
7. Display the GCD.
8. Stop.
