SAPID-59032928

BATCH-15

Question

Write a C program to find the length of the longest substring without repeating characters using a function longest_unique_substring() and pointers.

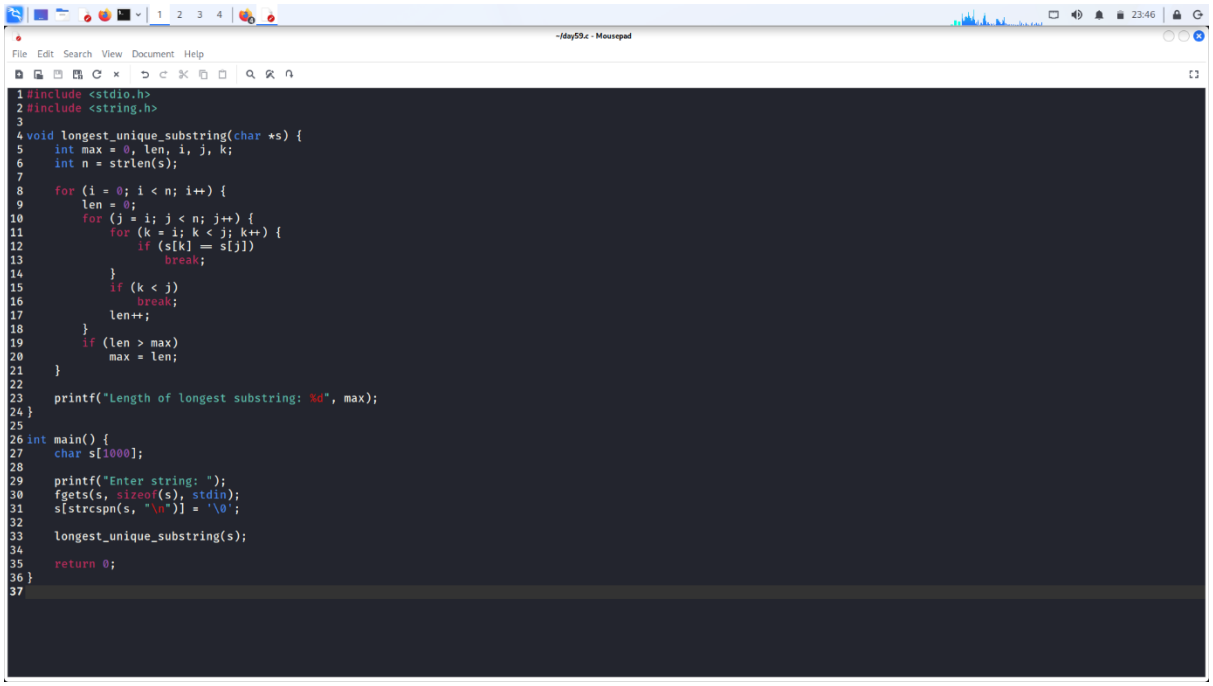

Aim

To write a C program to find the length of the longest substring without repeating characters using pointers and functions.

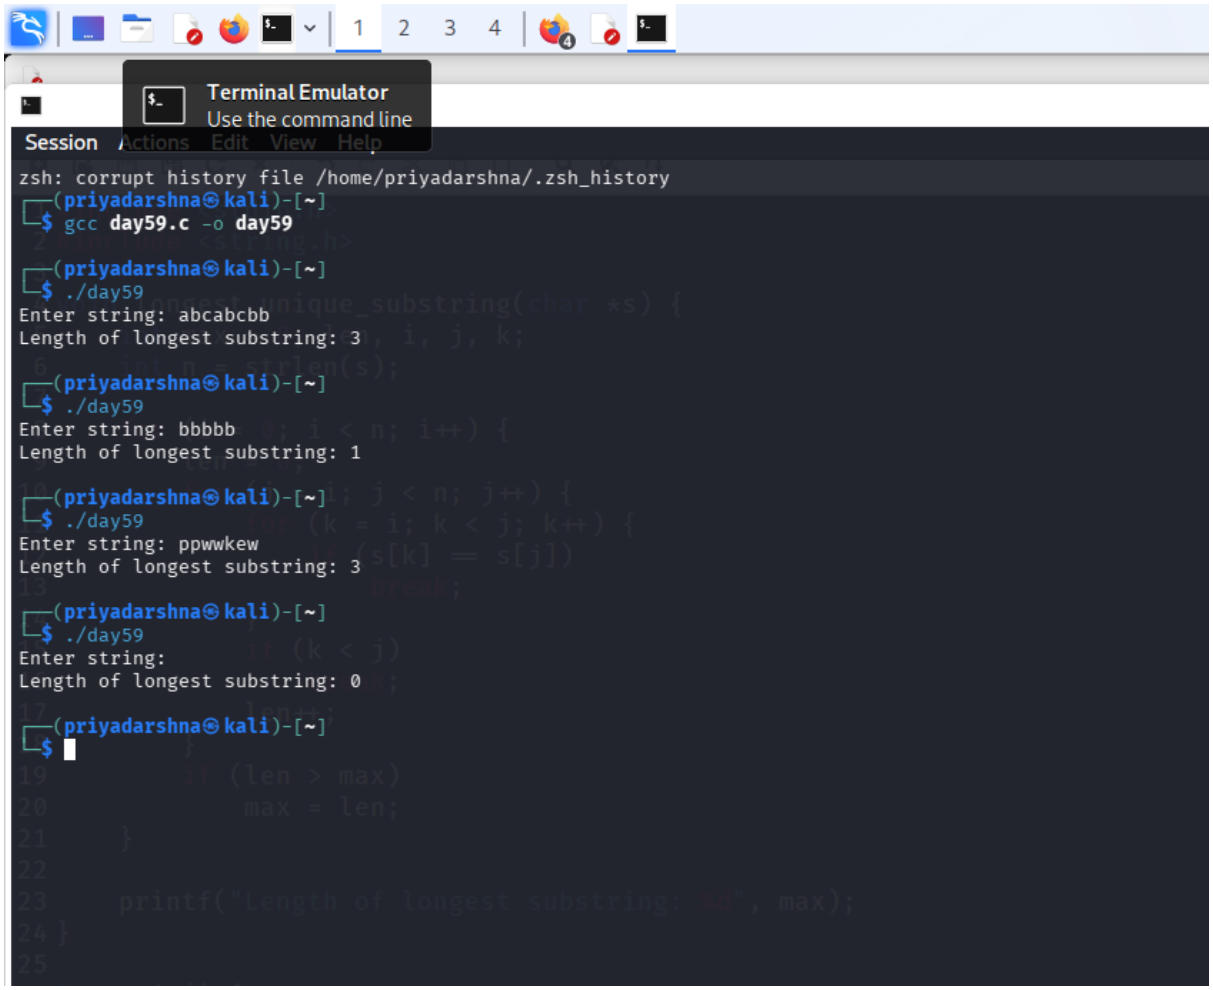

Algorithm

1. Start the program.
2. Declare a character array to store the string.
3. Read the string from the user.
4. Pass the string address to longest_unique_substring().
5. Use a loop to check characters without repetition.
6. Calculate the maximum length of the substring.
7. Display the length of the longest substring.
8. Stop the program.
